

CHATEAU HAUT-BRION

## *Château Haut-Brion 1964*

Château Haut-Brion's tasting notes :

A VERY GOOD YEAR

The grapes were ripe and very fragile. Haut-Brion started its harvests very quickly, and they were nearly finished before the rains. The wine is today flavorful, long, with finesse needing more time to achieve fulfillment.

### *Weather conditions*

Sum of temperatures : 3327 °C

Rain : 339 mm

Days where temperature above 30 °C : 31

Harvest : from 28/09/1964 to 06/10/1964

### *Current vintage notes*

An early year with much good weather. June and July were dry and hot. August had its typical storms, and September was very hot, so that the harvest had to be completed quickly. From October 5th on, rain fell constantly for 3 weeks, ruining the hopes of those who had waited too long to harvest.
