

CHATEAU HAUT-BRION

## *Château Haut-Brion 1981*

Château Haut-Brion's tasting notes :

### A GOOD YEAR

Severe coulure and millerandage at Haut-Brion. Therefore the production is small but the wine is very characteristic of Haut-Brion. Great complexity and very tannic.

### Weather conditions

Sum of temperatures : 3157 °C

Rain : 292 mm

Days where temperature above 30 °C : 17

Harvest : from 24/09/1981 to 08/10/1981

### Current vintage notes

Spring was not very nice still with a few hot days in June. Therefore some \coulure\" and millerandage happened. August was very hot and dry. Northern winds persisted. September was satisfactory with a few days rain prior to picking, but then very good weather conditions followed ail through the harvest."''''
